

**Sundstrom's comfortable full face mask respirator lets you work longer with less effort and better protection, and at less cost. In the farming/ ranching and agricultural field. One Farm Pack includes everything you need.**

### Better Protection

Sundstrom's P100 filter eliminates 99.997% of particles. NIOSH only requires 99.97% efficiency. That means our P100 filter is 10 X more effective, providing 10 X better protection.

### Greater Comfort and Less Breathing Resistance

Our flexible Silicone mask fits great. Sundstrom's unique design significantly cuts inhalation and exhalation resistance making the mask twice as easy to breathe through. This increases comfort and lengthens use time.

### 250% More Air Flow

Our full face mask respirator and P100 filter allows breathing rates of more than 250 liters per minute as compared to most competitive products which generally allow only 95 lpm. This means the Sundstrom user can handle much heavier work loads.

### Adaptable System

The SR 200 full face mask respirator can be used with our P100 filter and / or a range of chemical cartridges which can be "piggy-backed" together.

### Far Less Cost Over Time

The SR 200 is easy to maintain, clean and disinfect. Our distinct pre-filter system prevents premature clogging of the particulate filter and extends filter life up to 5 times longer than competitive products.

## Your Farm Pack contains:

*Silicone respirator*

x1

*P100 particulate filter*

x1

*OV/SD/CL/HC/HF Chemical cartridge*

x1

*Pre-filter*

x10

*AM/MA Chemical cartridge*

x1

*Pre-filter holder*

x1

*Users manual*

x1

*ID label*

x1

*Storage box*

x1

# Sundström

## FARM PACK

**Great protection, comfort and breathability!**

### Main features:

- Non-allergenic, FDA approved Silicone respirator.
- A superior face seal means a very high protection factor.
- Integrated outer and inner mask.
- Large field of vision
- Unique inhalation and double exhalation valve design provides one-half the breathing resistance of competitive respirators. This means easier breathing and greater respirator compliance.
- Easily adjustable textile head harness.
- Extra large 201 square inch P100 filter area provides extremely low breathing resistance, high air flow and extended filter life.
- High-efficiency P100 particulate filter offers ten times more filter effectiveness than required by NIOSH. Each filter tested for 99.997% filter efficiency.
- Pre-filter system collects coarse particles thereby extending the life of the P100 filter.
- Mask can be used with or without supplied chemical cartridge.
- Easily fit tested and fit checked.
- NIOSH approved.
