SR 900 SYSTEM

Sundström 

SR 900 SYSTEM

SR 900 is a completely new system where the user can easily customize the product based on application and specific needs.

EXCEPTIONAL
FIT WITH HIGH
PERFORMANCE
AND COMFORT

Soft/durable TPE with wide face seal surfaces provides a high level of protection

Low weight.

Three sizes available to ensure the best possible fit for most face shapes.

Elasticated, easily adjustable head harness with large crown plate for a comfortable secure fit.

Range of accessories and service kits available.

Double moulded TPE/PP mask with a detachable filter holder allows you to expand your own system.

SR 951 & SR 952 HOSE

Single hose SR 951 and twin hose SR 952 are very flexible and offer high durability.

- Hose selection based on application and preference.
- FR hose protection available for welding and grinding applications.

SR 951

SR 952

SR 900 HALF MASK

Half mask with excellent fit, high protection level and excellent breathing comfort.

- Extremely low inhalation and exhalation resistance reduces wearer fatigue.
- Compatible with all Sundstrom Safety APR filters and cartridges.
- Suitable for any half mask application where particulate and/or chemical protection is required.

SR 905 REMOTE FILTER

Remote filter for connection to SR 900 using single hose SR 951 or twin hose SR 952.

- Hose selection based on application.
- Extremely low inhalation and exhalation resistance reduces wearer fatigue.
- Compatible with all Sundstrom Safety APR filters and cartridges.
- Low profile that easily fits underneath standard welding and/or grinding shields.
